

IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF GEORGIA
ATLANTA DIVISION

JANE DOE
AN INDIVIDUAL,

Plaintiff,

v.

XYTEX CORPORATION
a Georgia Corporation, et al.,

Defendants.

CIVIL ACTION FILE
NO. 1:16-CV-1729-TWT

OPINION AND ORDER

This is a wrongful birth case. It is before the Court on the Defendants Xytex Corporation, Xytex Cryo International LTD, Mary Hartley, and Todd Spradlin's Motion to Dismiss [Doc. 12]. For the following reasons, the Defendants' Motion to Dismiss is GRANTED.

I. Background

The Plaintiff is a resident of Ohio. She has one child who was conceived by means of artificial insemination with semen purchased from the Defendant Xytex Corporation. The Defendant Xytex Corporation is a for-profit sperm bank with its principal place of business in Georgia. It is owned by the Defendant Xytex Cryo

International LTD. The individual Defendants were associated with the Atlanta office of Xytex in various ways.¹

On October 18, 2000, James Aggeles applied to be a sperm donor with Xytex.² On his application, Aggeles claimed that he had a Bachelor's Degree, a Master's Degree, and that he was working toward his Ph.D. in artificial intelligence.³ None of this was true, however, as Aggeles had actually dropped out of school at that time.⁴ Prior to applying to be a sperm donor, Aggeles had also been hospitalized and diagnosed with psychotic schizophrenia, narcissistic personality disorder, and significant grandiose delusions.⁵ But during Aggeles' first visit to Xytex, the Defendant Hartley suggested to him that more educated donors did better selling their sperm.⁶ As a result, Aggeles filled out his application falsely by inflating his educational background and lying about his mental health history.⁷

Despite Xytex's claim that all applicants went through a rigorous qualification procedure that takes months to complete, including a medical review and regular updates to their medical and criminal histories, Aggeles was approved as a donor within two weeks.⁸ The Complaint alleges that he was only given a ten minute physical examination, during which no physical or mental health history was discussed.⁹ After Aggeles was approved as a sperm donor, he was hospitalized numerous times for mental health reasons, and was arrested on numerous occasions.¹⁰

Between 2000 and 2016, Aggeles became one of Xytex's most popular donors.¹¹ Families often desired the sperm of highly educated and accomplished people, and Xytex promoted Aggeles as such a donor based upon the information in his application. During those years, Aggeles became the biological father of at least thirty-six children through Xytex's sale of his sperm, including the Plaintiff's child.¹²

The Plaintiff, a single woman from Ohio, had first heard about Xytex through an internet search, and after some research, decided that using sperm from Xytex

would be her best available option to have a child. The Plaintiff then called Xytex directly and requested to view sperm donor profiles. A Xytex representative sent the Plaintiff a variety of profiles, including that of Aggeles. When she came across Aggeles' donor profile, known as Donor #9623, she was intrigued because he was represented to be educated and healthy. The Plaintiff then called Xytex again to ask for more information. A Xytex representative responded that Aggeles' sperm was extremely popular and had been successful in achieving pregnancy. As a result of Xytex's representations, the Plaintiff purchased Aggeles' sperm and gave birth to her child, who is now approximately nine years old.¹³

In June of 2014, Xytex inadvertently disclosed Aggeles' identity, and the Plaintiff was then able to discover much of Aggeles' educational and criminal history through a simple internet search.¹⁴ As a result, the Plaintiff filed the Complaint on May 27, 2016, alleging eleven different causes of action against the Defendants, including fraud, negligence, and breach of warranty. The Defendants now move to dismiss the Complaint for failure to state a claim.

II. Legal Standard

A complaint should be dismissed under Rule 12(b)(6) only where it appears that the facts alleged fail to state a “plausible” claim for relief.¹⁵ A complaint may survive a motion to dismiss for failure to state a claim, however, even if it is “improbable” that a plaintiff would be able to prove those facts; even if the possibility of recovery is extremely “remote and unlikely.”¹⁶ In ruling on a motion to dismiss, the court must accept the facts pleaded in the complaint as true and construe them in the light most favorable to the plaintiff.¹⁷ Generally, notice pleading is all that is required for a valid complaint.¹⁸ Under notice pleading, the plaintiff need only give the defendant fair notice of the plaintiff’s claim and the grounds upon which it rests.¹⁹

III. Discussion

The Defendants' primary argument is that all of the Plaintiff's claims are derivative of a wrongful birth action, and because wrongful birth claims are not recognized in Georgia, the Plaintiff's claims must be dismissed. In other words, the Defendants argue that all of the Plaintiff's claims fundamentally stand on the assertion that if the Plaintiff had known the truth about Aggeles, the Plaintiff's child would not have been born. The Plaintiff, for her part, argues that this case is not one for wrongful *birth*, but rather for wrongful *conception*.

In Georgia, wrongful conception claims generally arise when a sterilization or abortion procedure goes wrong and a live birth unintentionally results.²⁰ In such a case, the measure of damages allows "recovery of expenses for the unsuccessful medical procedure which led to conception or pregnancy, for pain and suffering, medical complications, costs of delivery, lost wages, and loss of consortium."²¹ By contrast, wrongful birth claims normally arise when the parents contend they would have aborted the child if they had been fully aware of the child's condition.²² While wrongful conception claims have been allowed in Georgia, wrongful birth claims have

²¹ Id. at 443.

²² Atlanta Obstetrics & Gynecology Grp. v. Abelson, 260 Ga. 711, 713 (1990).

not.²³ The Plaintiff argues that the functional differences between these two torts are (1) the timing of the tort (i.e., pre- or post-conception), and (2) whether a defendant's actions directly or indirectly caused the injury. According to the Plaintiff, when the wrong occurs before conception and directly causes the harm, as in failed sterilization cases, the tort is allowed. And when the wrong occurs after conception and indirectly causes the harm, as in failure-to-diagnose cases, the tort is disallowed.

The Plaintiff is incorrect. The reason why Georgia courts have looked on wrongful birth claims with disfavor is not because of the timing of the tort or the causal link between the defendant and the harm. The true difference between the two torts is the measure of damages. Wrongful birth claims are disfavored because they require the court to decide between the value of a life with disabilities and the value of no life at all. The Georgia courts are “unwilling to say that life, even life with severe impairments, may ever amount to a legal injury.”²⁴ In this case, the Plaintiff essentially claims that had the Defendants been truthful with her about Aggeles' history, she would not have used his sperm and her child would not have been born.

²³ Id. at 714; Campbell v. United States, 962 F. 2d 1579, 1583 (11th Cir. 1992) (“In the instant case, while Georgia has a statute which permits injured parties to recover for medical malpractice committed by private parties, this statute does not permit recovery for the tort called wrongful birth.”).

²⁴ Abelson, 260 Ga. at 715.

The Plaintiff attempts to mask this truth by describing the Defendants as having “exposed Plaintiff’s [sic] and her child to [Aggeles’] traits through their misrepresentations.”²⁵ But a genetic disease is not the same as a virus or a bacteria. Avoiding “exposure” to Aggeles’ various mental health problems would not mean the Plaintiff’s child would be healthier; it would mean her child would not exist. This is a wrongful birth claim, and it is not allowed in a diversity case applying Georgia law.

IV. Conclusion

For the reasons stated above, the Defendants’ Motion to Dismiss [Doc. 12] is GRANTED.

SO ORDERED, this 17 day of March, 2017.
